2.33 (b)

DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

Each research facility shall establish and maintain programs of adequate veterinary care that includes daily observation and recordkeeping of its animals health. It was noted that the recordkeeping requirements was inadequate on the nonhuman primates housed in the Neurosensory Building. This noncompliant item was discussed and explained to the managers of its significance and as a research facility recordkeeping requirement.

TO BE CORRECTED BY: 01/28/04.

3.75 (a)

HOUSING FACILITIES, GENERAL.

Housing facilities for nonhuman primates must be designed and constructed so that they are structurally sound for the species of nonhuman primates housed in them. It was noted in the rabbitry of the Neurosensory Building that the overhead vents and light fixtures had an accumulation of dust on their surfaces. In the room for cage cleaning (dirty side) of the same facility, the following noncompliant items were noted. (1) The wall has been damaged by the large metal cage wash door. (2) The overhead light fixture has flaking paint on its surface. In the Taub Building the following noncompliant items were noted. (1). The sanitizer room had overhead vents and walls with flaking paint. The cement walls on both sides of the sanitizer (clean and dirty sides) have flaking paint probably due to steam. These noncompliant items need to be corrected to facilitate good husbandry practices as required by the regulations.

TO BE CORRECTED BY: 4/15/04.

(f)

All drains must be properly constructed, installed and maintained. It was noted in the Neurosensory Building, the dirty side of the cage wash room has poor drainage due to a floor defect. The floor defect needs to be corrected to minimize the accumulation of animal and food wastes, bedding, debris and water.

TO BE CORRECTED BY: 06/20/04.

The last routine inspection was conducted on 08/12/04. This routine inspection was conducted with

and USDA VMO (S), Jeanne Kjos, Earnest Johnson and USDA SACS Daniel Jones, D.V.M.. The exit review was conducted with the Dr. Jeanne Kjos, Dr. Daniel Jones and Dr. Earnest Johnson.
